Chicago, IL
UX/UI design
Graduation: October 2015

North Central College,
Naperville, IL
Bachelor of Arts,
Interactive Media Studies
Graphic Arts & Interactive
Technology
Graduation: June 2015

EXPERIENCE

USER EXPERIENCE CONSULTANT

Slalom, LLC. | September 2016 - Current

As a User Experience Consultant at Slalom Cross-Market, I work alongside a team of technical and project leaders, practicing design thinking in order to solve business problems. To ensure a holistic user experience, I maintain a full-stacked design tool kit by facilitating workshops and UX research and developing and iterating on: wireframes, user flows, information architecture diagrams and high-fidelity prototypes for both web and mobile experiences.

UX DESIGNER

Caxy | April 2016 - September 2016

Work with an Agile team of project managers, product owners, designers, developers and project stakeholders to design and optimize digital products. Develop artifacts including journey maps, system flows, UI specifications and prototypes based on usability testing and user scenarios. Practice empathy while advocating optimal user experience.

DIGITAL GRAPHIC DESIGNER (FREELANCE)

Kindle Communications | November 2015 - April 2016

Create digital design solutions for large-scale campaign events and conventions for Kindle Communication clients. Work with creative team to execute quality designs within a strict time frame. Projects include: web portals, interactive infographics and websites.

Clients: McDonald's, Cushman & Wakefield, Takeda

UX DESIGNER

Reliefwatch/Sokowatch | December 2015 - February 2016

Collaborate with a team of developers and business analysts to design a sales and inventory tracking mobile application. The application is designed for emerging market environments such as Nairobi, Kenya. Optimize the company-facing web application for managing and visualizing data collected via the mobile application. Utilize heuristic evaluations and market research to create efficient cloud-based software for a unique audience.

UX/UI DESIGNER

DESIGNATION Labs | August 2015 - October 2015

Working in DESIGNATION teams, collaborate with clients to design mobile and web applications. Conduct user-experience research such as competitive analysis, user interviews, prototyping, and user testing. Optimize applications through the creation of cohesive branding, customized icon sets and style guidelines.

Clients: Insightful Decisions, Intercept Software
